

FAT-CAT™

All Natural Carbohydrate & Protein Body Builder

**Contains No
Animal
By-products!!!**

***Precision engineered to
provide all horses with
a powerful blend
of nutrients designed to
enhance optimal muscularity,
sound firmness and peak fitness.***

Equine Super-Food: World-class trainers, noted veterinarians and top-ranking equinists have reported that Fat-Cat is one of the hottest, most dynamic nutrition systems on the market to help create structural power and higher energy density for all hard working horses, in all disciplines, at all fitness levels. Fat-Cat is truly the most perfect supplement for all horses and ponies. Here's why...

- **Sound Co-Active Formula:** Fat-Cat is an intelligent, well-balanced nutrition system armed with body constructing nutrients at levels calculated to be safe, effective, healthy and practical. Its nutritional ratios calibrate your feeding program to the demands of intense training or modest activity. These select nutritive proportions respond to factors such as growth, pregnancy, lactation and workload.
- **Muscle Mass Formation & Development:** Fat-Cat contains a proprietary matrix consisting of the finest quality proteins that possess excellent amino acid profiles and anabolic factors required for creating, building and maintaining solid muscle tissue. Anti-catabolic factors are then added to help combat muscle mass loss during periods of strenuous endurance training.
- **Higher Energy Density:** A premium carbohydrate loading system blended with energy metabolizers to provide a sustained release of energy to fuel muscle contraction during high intensity workouts and endurance events, without unwanted excitable behavior.

- **Highly Digestible:** Fat-Cat boasts an exclusive blend of microbial populations and enzymes to increase breakdown and mobilization of protein, carbohydrate and fat along with essential micronutrients for superior fuel efficiency and muscular development. For older horses with less efficient digestive systems, this qualified admixture aids the digestive process for complete nutrient absorption and assimilation by the body.
- **Maximum Fitness & Health:** A delicious, cost effective, easily prepared muscle food with pure amino acids, carbohydrates, vitamins, minerals, microbial populations and other proven metabolic optimizing ingredients, so that the ultimate gains in stamina, size, strength and leanness can be achieved.
- **Strong, Healthy Hooves:** Fat-Cat is formulated with scientifically devised proportions of L-lysine, DL-methionine and biotin to promote highly valued hoof resilience. These important hoof-forming elements are the building materials necessary for strong, healthy hoof horn.
- **Beautiful Coat Condition:** Fat-Cat contains both omega-3 and omega-6 fats, the essential fatty acids (EFA's) needed for a healthy, shiny bloom to the coat. A dramatic difference you can see.
- **Convenient and Economical:** A convenient and economical way for your horse to consume high quality amino acids, the building blocks of protein and muscle tissue. The guesswork of mixing and matching carbohydrates to spare protein is eliminated, as well as the balancing of vitamins and minerals responsible for chemical reactions. Make Fat-Cat an important part of your training regimen to support energy, strength, growth and recovery needs for high intensity, exhaustive bouts of exercise.

Dear Vapco,

I want to thank you for recommending Fat-Cat and Flex-It for my performance horse Kimberiah. As you may remember, she was coming off a long lay-up and exhibited muscle atrophy, little energy and no effort. I began using Fat-Cat and Flex-It and immediately saw an improvement in the level of my horse's energy and performance.

Subsequent to that incident Kimberiah suffered a suspensory ligament injury and was confined to her stall for three months. Interestingly, when she came off this lay-up she had almost no muscle loss, lots of energy and was happy to get back to work.

I am happy to share her successful rehabilitation that has allowed me to participate in an active show season which so far has produced blue and champion ribbons. As you can see, Kimberiah is feeling well and performing with her "highest" effort.

Thank you Fat-Cat and Flex-It. I highly recommend these products as daily supplements for all horses.

Sincerely,

Gail Corriveau, Trainer, Hillside Equestrian Meadows, Wolcott, CT

Gail Corriveau and "Kimberiah"
