# U-FREE™

## GASTRIC DEFENSE ORAL SOLUTION™

**Product Description:** U-Free™ is a safe and effective stabilized liquid suspension of active ingredients designed to help coat, soothe, and protect the stomach from constant exposure to gastric acid.

**Indications:** For all classes of horses and foals prone to ulcers and ulcer related problems. Horses differ from humans because they secrete stomach acid 24 hours a day. Infrequent feeding, intense exercise, traveling, extended time in stalls, along with other physical stress factors, will cause the pH balance of the stomach to change drastically. Hydrochloric acid attacks the lining of the stomach and ulcers result.

**Directions:** Administer 2 oz. with an oral syringe twice daily for 7 days. Reduce to a maintenance measure of 2 oz. daily thereafter. For a stronger effect continue with 2 oz. twice daily as necessary. As an alternative, U-Free™ may be given with feed.

**Ingredients:** Certified Organic Aloe Vera, Calcium Citrate, Magnesium Sulfate, Xanthan Gum, Lecithin, Pure Licorice, and Chamomile.

“I have been feeding U-Free to my horses as an affordable option to help against stomach ulcers. The results have been amazing. They eat better and they love the taste. Everyone should try it for their horse.”

Scott Rollins, *Leading Trainer, Meadowlands Racetrack*
